SUMMARY

Technical Game Developer with 5+ years of experience specializing in multiplayer architecture, real-time synchronization, and cross-platform development. Expert in Unity 3D (C#), with proven proficiency in Unreal Engine (C++) and Godot. Specialized in integrating Photon 2 to manage low-latency networking for high-scale environments. Passionate about optimizing game performance and building artist-friendly tools to streamline production pipelines.

EXPERIENCE

Unity 3D Developer

Alter Learning - Educational Platform

Sep 2025 - Present Remote

- Engineered networked logic for a flagship multiplayer educational title and high-performance hyper-casual games using Photon 2.
- Architected real-time synchronization systems, implementing state interpolation and lag compensation to ensure seamless low-latency interactions.
- Optimized network traffic and serialization protocols, significantly reducing bandwidth overhead for high-scale mobile environments.
- Collaborate with the core engineering team to maintain a robust, scalable codebase across a diverse project portfolio.

Unity 3D Developer

TryApp Games

Sep 2023 - Aug 2025 Remote

- Developed two educational mobile titles (e.g., [SpaceVentura](#)), focusing on culturally-rich gameplay mechanics for children.
- Engineered custom, artist-friendly editor tools that reduced UI implementation time and increased overall productivity.
- Collaborated with UI/UX team to polish 20+ 2D minigames, utilizing Agile/Scrum methodologies to ensure rapid, high-quality deployments.

Freelance Unity 3D Consultant

WeDo! Entretenimento

Nov 2024 - Mar 2025 Remote

- Responsible for contributing with project coordination and developing new game play features for the game [E-Teatro WeDo!](#).
- Actively performed **20+** bug fixes to improve game stability and user experience.
- Implemented **Firestore event tracking** to monitor player behavior and support data-driven improvements.

Unity 3D Developer

RadarFit

Feb 2022 - May 2023 Belo Horizonte, Minas Gerais

- Significantly contributed to the development of multiple new features, and **100+** bug fixes on [RadarFit](#) app.
- Developed with my team a **brand new app**, the [SIGA Sipat](#) initiative.
- Implemented **asset bundles** to enable downloadable content such as avatars and scene updates.
- Added event tracking systems using **Firestore Analytics** and **Unity Analytics** to quantify player behavior and progression.
- Used **Firestore** to integrate **push and in-app notifications**, enhancing user engagement.
- Developed custom tools to streamline workflows and support faster iteration of future features.

EDUCATION

Digital games development

Pontifícia Universidade Católica de Minas Gerais

Feb 2019 - Dec 2021 Belo Horizonte, Minas Gerais

- As a programmer I contributed with my team to develop 3 complete Unity games: [System Defender](#), [Domum](#), and [ESRX](#), these games contributed significantly to my understanding of different types of gameplay.
- Mastered C# and Unity through development of Gameplay Systems (AI Pathfinding, AI Combat, Movement, Inventory Systems, Physics), and Procedural Generation.
- Contributed to a research project that resulted in a published article at SBGames 2021, called [Sucesso4Me](#).
